

Cyberica .NET Technologies Education Sector Services

Business Practices for Educational Institutions of Tomorrow

Overview

In 2002, it marked the arrival of B2C in the Education sector. In 2003 it established practices for pre-admission management services. Today Cyberica is known for its University/College process management services. Our solutions are known for reliability, performance, and security to signal the end of proprietary in-house process management.

Cyberica with its more than 6+ years experience working in Education Sector delivers the full value of consulting solutions. How? Through established process engines like admissionhelp.com which offers pre-admission management services to assessment modules for knowledge creation and generation via teachers and post-examination evaluation and result declaration services. Helping prevent I.T infrastructure lock-in and foster innovation. Giving opportunity to institutions do what they do best *"Evolve and Foster Education Lifecycle"*

Cyberica consulting solutions provide benefits in following key areas:

- Establishment and Restructuring of institution processes
- College Site Development
- Admission Management Services
- Student M.I.S
- E-Learning Framework

- Post Examination Management
- Other Administrative Work Flow Management Tools

Establishment and Restructuring of Institution processes

With emergence of I.T education sector institutions were on the front of investment in I.T Infrastructure. But most of the I.T infrastructure developed has been used for document processing and intra institution communication. In name of I.T many institutions have also developed online websites. But this expect for marking property online on world wide web has not helped much the institutions or the site users in most cases students gathering information on institutions.

We look at existing infrastructure established and try to map established business practices at institutions to make them more efficient, accountable and generate ROI from existing investments made. From Department administration to student management we customize practices to suite your environment.

Admission Management Services

Cyberica is leading brand in Admission management space. Using its proprietary *Admissionhelp.com – Admission management engine* we have been providing solutions to major educational institutions in India.

How Admissionhelp.com Works?

We work with admission department of your institution to map our established admission workflow practice.

Cyberica using Admissionhelp.com can provide following customized services

- Acceptance of Student Admission applications online
- Digitization of Online/Offline Application Received
- Issuance of Admit Card for CET
- Integration with existing Student Information Management System
- Admission Counseling Support Line

Admissionhelp.com software has been in use by leading institutions like G.G.S.Indraprastha University, Jamia Millia Islamia University, Hindu college, Daulat Ram College and many others.

Student Information Management

Cyberica has developed student information management system which can let institution manage

- Results Management
- Student Course Information Management
- Attendance Management
- Fee Management

Using this software either institutions can manage there own students efficiently and analyze data using

institution specific rules. In case institutions want Cyberica can also provide process management services. This removes them from headache of digitization of existing records and investing in software for which sufficient human resources may not be able for carrying forward computerization.

Other Integration and services available

- Admit/ Identity Card Generation
- Smart Card for attendance management of students/faculty
- Integration of Fee Management with Accounting Package

E-Learning Framework

We have developed E-learning software which enables teachers provide online support to offline teaching methodologies. Our Teacher – Student Interaction Module has been developed for institutions of higher learning. It provides following features

- Online Course Management
- Delivery of Lectures and Assignments
- Online Assignment Submission
- Internal Messaging system for student teacher interaction
- Knowledge management system for generation of F.A.Q and capturing of unstructured data

Framework developed by Cyberica is already used by educational institutions like Miles College, USA (<http://www.miles.edu>)
